Attention Homeowners:

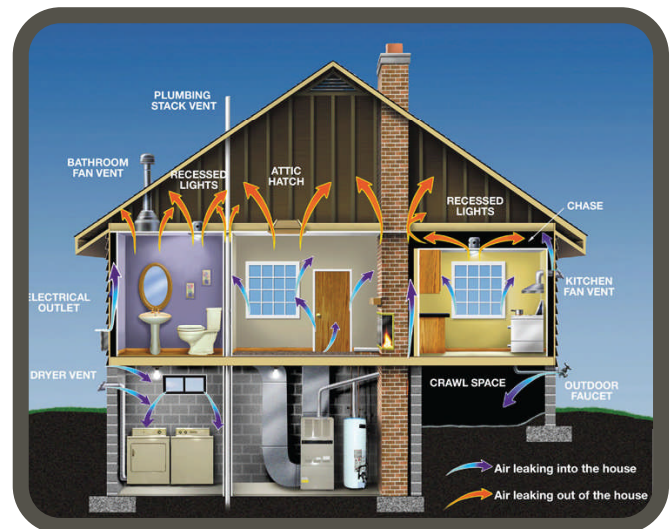

Do you have high energy bills, uncomfortable rooms, high moisture levels, excessive dust, mold, drafts, odors or unhealthy crawl spaces?

If so, invite the **Green Collar Crew** to be your team of Energy and Green Specialists to ensure increased home performance.

What is the green collar? CREW?

Green Collar Crew (GCC) is a Home Performance Contracting Network offering **Comprehensive Home Energy & Health Audits** and **Retrofitting** to ensure your home is more energy efficient, healthy and safe, comfortable, durable and environmentally responsible. GCC brings together the best home energy auditors, energy and green building trades, builders, and suppliers in the industry and manages your project from design to final testing.

GCC follows a house-as-a-system building science approach, utilizing state-of-the-art inspection and diagnostic techniques for determining proper comprehensive solutions for poor performing homes.

Call to Schedule Your Home Energy & Health Audit with:

803.328.2889

As home energy costs rise and our environment becomes more polluted, it is up to you to demand more energy efficiency and great performance from your home.

Green Collar Crew is owned and managed by Green Home Solutions, Inc.

CALL TODAY!

Step One: The Energy Audit

GCC recommends you begin your project with a **Comprehensive Home Energy & Health Audit**. Unlike more simple energy audits offered by others outside of our Network, GCC Auditors perform a full series of inspections and testing to assess your home's performance such as:

- Energy usage
- Air infiltration
- Insulation levels
- Thermal imaging
- Water heating and usage
- Duct leakage
- Heating and cooling equipment efficiency
- Room pressures
- Carbon monoxide
- ... to name a few.

Each of our Auditor Partners are required to complete our training program and are certified by nationally-recognized Building Performance Institute (BPI) for High Performance Homes and Healthy Living.

Our Auditor Partners will provide you with a detailed onsite report including energy and health upgrade opportunities and financial estimates specifically tailored to your home and priorities.

Step Two: Retrofitting Services

Working with your Auditor, GCC takes it from there helping ensure the recommendations you choose are implemented by our Trade Partners with the quality you deserve.

The Green Collar Crew has brought together a network of the industry's best energy and green building trades and suppliers to take your project from Audit to Completion. Each of our Trade Partners are qualified through a rigorous process ensuring they maintain up-to-date standards, green certifications, professionalism and the highest work ethics.

Additional Benefits:

- True third-party auditors
- One-stop shop for retrofitting
- Federal and state tax credits
- Energy and green retrofitting financing
- Option to manage your own project

Invite the GCC Energy and Green Specialists to manage your project – because after all, your home is your most important investment.

Home Energy & Health
Consultation \$150

Comprehensive Home Energy &
Health Audit starting at \$395

Whether you want to implement simple energy saving measures, create a healthier living environment for your family, remodel or build a green home from scratch, the Green Collar Crew can help you sort through the options and guide you toward the most effective solutions.
